**Position:** Business Analyst

**Department:** Large Programs

**City:** Brisbane, QLD

## Company & Position overview:

Verdia was founded with a simple mission – to save energy and transition the economy to cleaner, more sustainable energy sources. We do this by helping our customers take control of their energy costs and get smart about how to generate, use and manage energy.

Our team has deep expertise in solar, energy storage, LED lighting, embedded network, and other commercial energy equipment and solutions. We support clients on projects and programs from complex single sites, through to major infrastructure and large scale national rollouts.

We are looking for suitably qualified, talented and hardworking individuals to join our team in Brisbane and revolutionise the marketplace. Candidates should be passionate about quality and customer service in everything they say and do.

Experience in analysing data to identify solutions and develop an appropriate business case is essential. Recent experience in energy assessment and energy efficiency fields such as solar, LED lighting and/or battery storage would be viewed favourably. This role would be based in Brisbane.

**The Role:** You will have at least 5 - 10 years' experience in analysing commercial and technical data, generating solutions to complex project development questions and providing insights by filtering large data sets. You will also have relevant experience developing summary reports and business cases that communicate the findings to stakeholders. You will work closely with the Large Projects and Project Advisory team to identify and develop best practice energy solutions for our clients.

Project engineering experience in a commercial setting along with a solid technical background will be highly valued. In addition, you will need to have the capacity and ability to work concurrently across multiple projects of varying complexity.

## Skills required:

As the ideal candidate, you will be able to demonstrate the following:

- Previous experience in a similar consulting or analytical role
- Strong technical skills in Business Analysis and Business Process Improvement
- Preferably a tertiary qualification in Commerce, Engineering, or Finance
- Solid understanding of energy assessments in the renewables energy sector beneficial
- Solid working knowledge of Solar and Lighting beneficial
- Solid working knowledge of all the MS office suit
- Proven capability in working with effective teams
- Demonstrated experience in presenting commercial outcomes to influence internal / external stakeholders
- Demonstrated experience and confidence engaging and building credibility with senior stakeholders and building internal/external networks
- Ability to generate insight from ambiguity and quantify the value of implementing a solution
- Demonstrated problem solving capabilities

## Key Responsibilities:

- Work collaboratively within the Large Projects and Project Advisory teams to review and analyse energy assessments
- Develop business cases and presentations including economic outcomes and investment reports
- Be able to support your reports, solutions or any tasks performed with high degree of authority

- Analyse large data sets to produce load profiles, interval data analysis, solar assessments, lighting assessments, PFC assessments etc.
- Analyse large data sets to produce market and industry sector segmentation
- Produce opportunity, trend and operational reports on a regular basis with high level of data accuracy
- Assist the team with complex problem solving utilising commercial metrics such as cost/benefit analysis, ROI, IRR, NPV and other finance calculations
- Ability to provide detailed and high quality documentation (excel, word, powerpoint)
- Utilise your renewable energy knowledge to add value to ongoing and future projects
- Support the Large Projects and Project Advisory teams to develop and deliver quality outcomes for our clients

**If you are ready to join the Verdia team, please email [verdiaemployment@verdia.com.au](mailto:verdiaemployment@verdia.com.au) and include your current CV and cover letter. Applications without these documents will not be considered.**
